People health & safety.

# 1GO SHUTTLE

A shuttle service offering that uses advanced Transportation Management System (TMS) platform that enables efficient route planning for pick-up and drop-off of passengers. Keeping in mind the welfare and safety of their employees, organizations today deal with spending too much time and effort in planning and dispatching their company's shuttle service. However, in doing so, they neglect performing a lot of their core functions. This leads to inefficiencies and eventually, poor business results.

1Go Shuttle is a solution that covers planning, dispatching, and van sourcing. It likewise provides an interactive experience to its users bringing them convenience and worry-free transit.

## Features:

- Route Planning for single site and multiple site operations
- Automated booking and employee notification
- Van Dispatching
- Daily trip reports
- Van sourcing and supply

Experience 1Go Shuttle today!
