

# CentrixMobile Delivery Information System

Logistics management has never been more easy than it is today with In1go's CentrixMobile Delivery Information System (CMDIS).

The CMDIS is a fully integrated management system of the fleet, shipment, yard, down to the level of the delivery team. The system utilizes HERE Maps, using geofencing as trigger points for tracking of load and shipment arrival, as well as routing capabilities.

The CentrixMobile Delivery Information System – built to help you and your team work better, faster, and more systematically.

## Features.

- Streamlined operations by automating relative processes such as dispatch, payroll, billing among others.
- Improved scheduling and management of fleets.
- Visibility of the entire transit and better control of shipment turnaround time.
- Systematic reports and data management leading to increased, over-all productivity.
- Interoperability with various systems.
- Real-time Delivery & Notification Status (ETA).
