Route Planning

(1)
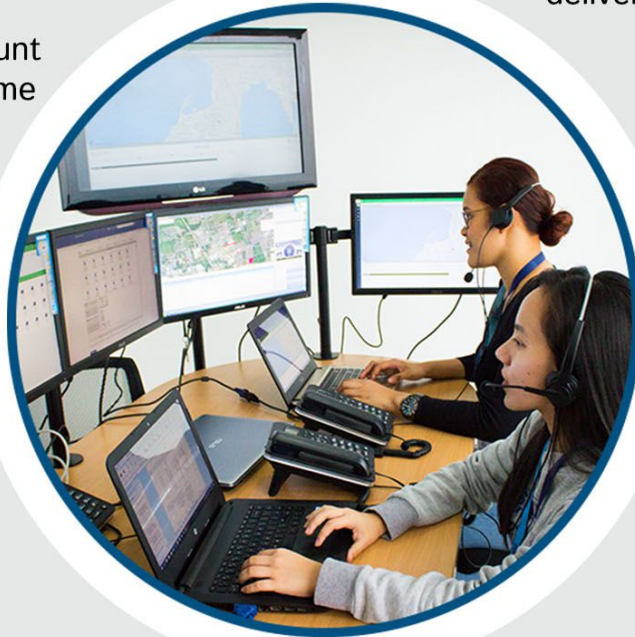

➤ Reduce operational cost by 10%-13% by automatically creating optimized routes with fully-utilized vehicles

➤ Creating routes taking into account customer peculiarities such as time windows, service time, road restrictions, and traffic will only take you minutes

Dispatch Planning

(2)

➤ A fully-functioning Loadboard provides organizations with real-time visibility of all deliveries encompassing

    ➤ Shipment Assignment

    ➤ Yard management

    ➤ Real-time location of vehicles

    ➤ Event monitoring for every delivery made (loading, unloading, arrival, delivery completion)

Reports and Analytics

(4)

➤ Make better decisions with real-time analytics and reports

    ➤ Call-time compliance

    ➤ Delivery performance (On-time and in-full report)

    ➤ Trip report

    ➤ Shipment accuracy

    ➤ Truck fill rate

Track and Trace

(3)

➤ A mobile-based application for drivers providing:

    ➤ Real-time location

    ➤ Automated ETA alerts to customer

    ➤ Delivery milestones (loading, unloading, arrival, delivery completion)

    ➤ Electronic proof of delivery (digital signature and photos)
