

CONTAINER MONITORING

CONTAINER TRACKER - JT700 SERIES

The rapid growth in the containerized market leads us to engaging technology in a more comprehensive manner. With today's advanced systems with features such as real-time tracking and tamper proof locks, operational threats are eliminated. These systems likewise increase and widen visibility of the entire workflow-processes and activities both from inside and outside the container.

GPS devices now function as intelligent tracking devices and as locks specially created for cargo and freight containers.

Key Features

Battery life lasts for 3 months

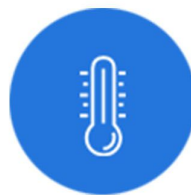

Easy installation

Door status monitoring

Door remote control

Temperature monitoring

Reefer status monitoring

Dual Sim supported

Tractor/trailer matching

JT701

JT700

JT701 is a intelligent tracking lock device for asset management system. The main feature can be list as: Designed unlock not by key, but by RFID/remotely password; With big capacity battery, long working time; Built-in wireless module, real time online monitoring ; Built-in GPS module, global locating ; safety control, illegal unlock alarm and so on. The application can be container, trailer, Van type trucks and other types of trucks remote monitoring system.

Key Features

- Unique Design, Unlock with RFID/SMS Password
- Big Capacity Battery, Long Working Time
- Built-in GSM Module, Remote Online Monitor
- Built-in GPS Module, Real Time Global Positioning
- Safety Monitoring, Alarms for illegal unlocking

Functions

Transmission Mode	TCP / SMS
Data automatic upload	Time interval
Locating mode	GPS / LBS
Vibration detecting	Built in 3G sensor
Lock status monitorina mode	real time monitoring
Unlock	RFID/remote password
Wake up mode	Call / SMS / Swiping card / Vibration ? Lock-string tamper
Alarm	Lock-string tamper alarm
	Swiping card alarm
	Unlock alarm
	Wrong password alarm
	Geofence alarm

Parameters

Dimension(LxWxH)	195mmx114mmx37mm
Housing Material	Engineering plastics
Weight	700g (with standard accessories)
Built in battery	12000mAh rechargeable lithium battery
Working temperature	-20°C---+60°C
Storage temperature	-40°C---+80°C
Relative humidity	5%--99%
Waterproof Grade	IP65
Average standby current	Less than 0.1mA
Average working current	Less than 90mA
GSM frequency	900/1800/1900 Mhz

JT700 is a type of GPS tracker device mainly designed for managing and tracking mobile assets container. The features of JT700 can be list as following: support door open alarm, tamper alarm, waterproof, low-power design, high-capacity battery, dual-way locating and so on. Moreover,the installation is very easy and convenient. Besides containers, JT700 is also suitable for remote monitoring, trailers, trucks, mobile asset management, other bulky cargo transportation and so on.

Key Features

- Real time tracking
- District defence
- Door open alert
- Time zone different setting
- Anti dismount design
- Protection grade: IP67
- GPS/LBS
- Ultra low power consumption design

Functions

Type	Description
Basic Function	Real time tracking, timing tracking
	Support multi timing uploading
	1000pcs blind area storage
	GPS/LBS
	Low power consumption
	Time zone difference seting
	Remote restart
	IP67 Protection grade
	anti disamount alert
	area alert
door close/open alert
